## Laconia Firefighters Honor US Soldiers Overseas

Every Friday Laconia firefighters arrive at work wearing red shirts emblazoned with a yellow ribbon. They've been doing this for quite awhile and are hoping the trend will catch on at other area departments. The reason? The shirts are worn to honor our soldiers who are fighting overseas. 🚒

Firefighters at the Weirs Station, left to right:  
FF Dave Monasky, Lt. Tim Woods, and FF Kyle Joseph.

Firefighters at Central Station show solidarity with US Soldiers fighting overseas. Standing, left to right: FF Steve Hanser and Deputy Chief Shawn Riley. Seated, left to right: Fire Secretary Trish Valovanie, FF Ray Eaton, Lt. Chad Vaillancourt, FF Chris Beaudoin, and FF Deb Black.

**SEND YOUR DEPARTMENT NEWS TO [debbiek@lrmfa.org](mailto:debbiek@lrmfa.org)**

Please send information and photos of new employees, promotions, retirements and general personnel news.

**If you have an idea for an article or would like to send an article about something of general interest, please feel free to do so. Articles will be published as space allows. Photos are also welcome.**

## Hi-Vis Jackets

STARTING AT JUST **\$115**

**SPIEWAK S578V**  
Public Safety Parka **\$150**

**GLOBE**  
Hi-Vis Jacket **\$360**

**GERBER**  
Response Parka **\$399**

**GERBER**

TJ-BJ Bomber Jacket **\$115**

**NINE-1-ONE**  
Battalion Chief Jacket **\$299**

### **Message From The Owners:**

In this issue of the Rural Hitch we are featuring popular jacket choices. Whether you are looking for Hi-Vis, night time reflectivity, department identification, protection from the elements, or protective EMS garments, we have a choice in your category. While the favorites are displayed here, please note that we have many choices that may be specific to your needs that may not be shown. Feel free to contact us for questions, or to have a representative stop by your department with samples.

Happy Spring!

# EMS Update

Shawn Riley, EMS Deputy Chief, Laconia Fire Dept./LRGHealthcare

Welcome to spring! The Lakes Region EMS Destination Protocol is up and running. We are not the first to have a Destination Protocol in the state but we are the first to have achieved it on a Regional basis. I would like to thank everyone who participated in the development and implementation of this program. Your efforts are going to drastically improve the outcomes for heart attack patients in the Franklin and Lakes Region catchment area.

Since February 1, we have had several successful Destination Protocol Activations. I would like to thank all the folks at Tilton-Northfield, Center Harbor, Stewart's Ambulance and Belmont Fire for their outstanding work. Also, if you or someone in your department does do a STEMI, please give me a call. I am trying to track our successes.

May is fast approaching and that means the annual LRGHealthcare Banquet and awards ceremony. We have sent out nomination forms to all the area chiefs and heads of service. If you know anyone or any group who should be recognized, please feel free to contact me and I will help you fill out the appropriate paperwork. The award categories are:

- EMS Provider of the Year – Franklin
- Paul Racicot Award for Excellence
- EMS Service of the Year Award
- EMS Provider of the Year – Lakes Side
- Unit Citation Award
- Lifetime Achievement Award

Also, LRGHealthcare has recently sent out a survey to all heads of service. We are currently evaluating the needs of area EMS services and are looking at ways of collaborating efforts. This is a very important effort – please take the time to respond. 🚒

# Laconia Fire Department

### 13 — Laconia Fire Department

**Fire Chief:** Kenneth Erickson  
**Address:** 848 North Main Street  
Laconia, NH 03246  
[lfchief@metrocast.net](mailto:lfchief@metrocast.net)

**Office**

**Hours:** 8–4:30, Monday–  
Friday

**Officers:** Dep. Chief Operations  
Deborah Pendergast  
Dep. Chief Fire Prevention Charles Roffo  
Dep. Chief EMS Shawn Riley  
Capt. Bill Drew  
Capt. Robert Landry  
Lt. Kirk Beattie  
Lt. David French  
Lt. Michael Shastany  
Lt. Chris Shipp  
Lt. Chad Vaillancourt  
Lt. Timothy Woods

**Apparatus:** 4 Engines  
2 Ladders  
3 Ambulances  
1 Forestry  
1 Gator  
3 Boats  
1 Mobile Air Compressor  
1 Dive Truck  
2 Equipment Trailers  
6 Staff Vehicles, including 1 Mobile Command Vehicle

### HISTORY OF THE DEPARTMENT

Laconia Fire Department has a long and somewhat convoluted history. The town of Laconia didn't come into existence until 1855, with the town becoming a city in

1893. Prior to that time it was known as Meredith Bridge. Lakeport was called Lake Village. The area originally was part of Meredith and Gilmanton, then later part of Gilford. Through all its various forms, it had some method of fire fighting, which was a good thing as various parts of the area burned to the ground on a fairly regular basis. Most of the buildings were built of wood and spaced closely together. One of the biggest fires in the state was in 1846 when most of Meredith Bridge (the area now called Downtown) burned. In 1860, the same area burned again! And it 1900, the area burned yet again!

Current Chief Kenneth Erickson has written an extensive history of the city's fire department. It is interesting reading and goes into much more detail than space allows here. The history tells of numerous large fires, where entire blocks of buildings were destroyed by fire. Lakeport was, for the most part, demolished by fire in 1903. Fighting the fire was difficult due to dry and windy conditions and eventually the fire extinguished itself when it ran out of things to burn.

Laconia Fire Department began as the Laconia Fire Precinct. It was

**Chief Kenneth Erickson**  
Laconia Fire Department

formed by a vote of the State Legislature in June 1875. Within the Laconia Fire Precinct there were several sub-precincts which would later be absorbed and become known as the Laconia Fire Department. The first official Fire Chief was George Sanders; his actual title was Chief Engineer. It appears the first full time firefighters were hired for \$10 per week in 1907. It isn't known if that was \$10 each or \$10 to be split between the two!

### GROWTH IN MANPOWER — AND IN CALLS!

Through the years the department has grown into a professional, highly-trained and well-equipped fire department. Call volume has increased to a level of over 3,000 calls per year, including fire calls, EMS, motor vehicle accidents and service calls. There are now three stations in service: Central, Lakeport and the Weirs. In addition to the Chief, there are three Deputies, two Captains, six Lieutenants and 24 firefighters, along with 10 call firefighters.

The Department is faced with protecting 18 buildings over three

**Laconia Central Station**

stories in the downtown area alone as well as thousands of 2 or 3 story buildings, numerous tenements and garden-style apartment complexes. Additionally, many homes are seasonal which brings accessibility issues into play during the winter.

Laconia has one of the highest number of rental units in the state, ranking second or third. It is the 15th largest by population but the

9th busiest fire department in New Hampshire. 40% of it's population are renters. It has the workload level of a city of 20,000 or 30,000 people but an actual population of 17,000.

It's responsibilities have expanded to include educating the public on health issues, including the H1N1 virus. There is a large immigrant population which adds

language as another hurdle when responding to calls. Fifteen percent of ambulance transports are due to assaults. Laconia is a small city with big city problems.

## **TRAINING, TRAINING, TRAINING**

How does the Department respond to these challenges? Chief Erickson stresses constant training and an aggressive response to an incident. The ladder, an engine and an ambulance respond to any alarm activation. This puts ample equipment on the road and at an incident and saves precious time when an alarm activation escalates to a full-blown fire. The Chief stated, "Besides going to calls, the most important thing a department can do is train." The police respond to calls where people threaten people, but when anything else threatens people, be it water in the basement or fire in the attic, folks call the fire department. And training allows the Laconia Fire Department to be

**Lakeport Station**

**LACONIA FIRE DEPARTMENT – CONT. ON PAGE 6**

ready to respond. As the Chief said, “We fix things for people.”

## CHIEF ERICKSON

Chief Kenneth Erickson began his career as a call firefighter in North Attleboro, MA in 1978. Like many chiefs, he grew up in a family of firefighters. His father retired as a Captain from the North Attleboro Department after 34 years. The last few years his Dad was with the department, Erickson was the Deputy Chief, something Chief Erickson said presented a few awkward moments! When Erickson became the Deputy Chief in North Attleboro, he was the youngest deputy chief in civil service history.

After leaving North Attleboro, he spent six years as the chief in Walpole, MA and then two years as chief in Duxbury, MA. In December of 2001, he moved to New Hampshire and became the Laconia Chief.

Weirs Station

His future plans for the department include modernizing their fleet of apparatus and renovating and adding on to the Central Station, which is very cramped at this time. Two lots adjoining the station have been purchased for this purpose but budget constraints have pushed off the actual building until

some time in the future. His goal is to have twelve firefighters on each shift, giving the city solid coverage for emergencies.

He is proud of the department and speaks highly of the professionalism and hard work its members put forth on a daily basis. 🚒

# First Alarm Structure Fire in Moultonborough

By Chief David Bengtson, Moultonborough

March 20, first arriving units at 285 Long Point Road in Moultonborough found a single-story ranch with approximately 1/3 involvement on the A-D-C sides, with a venting propane tank and a wild land fire with exposures. 5E4, the first arriving unit, deployed a master stream and stretched a 1-3/4" line. Neighbors reported the possibility of a female still in the building. 15E1 arrived on scene, after laying in a 4" line from the beach 1,000 ft. away. Moultonborough and Center Harbor personnel entered the building to perform a primary search but were evacuated due to rapidly deteriorating conditions and flashover. With the arrival of crews from Meredith and Holderness, the fire was brought under control and confirmation was made by Moultonborough Police that the female was not in the structure at the time of the fire. No injuries were reported. 🚒

## Salute to Service

On **Saturday evening, May 29** the **MS Mt. Washington** is having a special **Dinner Dance in honor of our Public Defenders**. If you are a **NH Firefighter, NH Policeman or US Military Personnel (active or retired)**, we want to offer you and your family/guest a special night on Lake Winnepesaukee with dinner and dancing for only \$25. Subject to availability — Call our ticket office at **603-366-5531 or 1-888-843-6686** to purchase your ticket in advance. The cruise is open to all for the regular price of \$49.

# Center Harbor Hydrant System Nearing Completion

After nearly two years in the works, Center Harbor Fire Chief John Schlemmer is pleased to report the water supply plan developed with the assistance of the New Hampshire Rural Fire Protection Initiative, supported by the North Country Rural Development Council is nearing completion.

Most of the 22 water supply sources designated by the plan have hydrants installed, with only five or six left to complete. The main hydrant system covers the village area and begins at the MS Mt. Washington dock with an 8" dry hydrant extending to a depth of over 20 feet of water in the bay. An engine would hook onto this hydrant and pump via two 4" lines into a nearby hydrant, which would then push water to the five hydrants located in the village. The system, composed of 8" lines except for a 12" pipe under Rt. 25, is set up to supply water to a 2,000' radius from each hydrant. The first 1,000' would come from hose laid by a first due engine, the second 1,000' would be attached by the second engine and thus 2,000' around the hydrant would be supplied with 1,150 gpm. The system was based on 1,000' lengths of hose as most apparatus carry that much.

In addition to the hydrants, there is a 40,000 gallon cistern available at Senter's market.

The resulting coverage will lead to a reduction in insurance costs for homeowners and businesses in the village area. Eventually, when the system is finished, the entire town could see a reduction in insurance premiums.

**Above: Hydrant lines within the village area. Map at right shows overlapping circles where areas are served by hydrants.**

If you look at a map of the 2,000' radius circles from each hydrant, or proposed hydrant, within Center Harbor, the bulk of the town is covered, with many circles slightly overlapping. Mapping for this project was supplied by the NH Bureau of Emergency Communications 9-1-1 mapping office.

Chief Schlemmer is enthusiastic about nearing the end of the project. He gives NCRDC high marks for their assistance. Eventually, the Chief would like to see Center Harbor and Moultonborough tied together by the hydrant system. 🚒

**Below, left: Closeup of "push" hydrant where the hydrant system in the village begins. Below, at right is the dry hydrant that reaches out into Lake Winnepesaukee. The push hydrant is seen in the back of the photo, near the telephone pole.**

## King-Fisher's Municipal Fire Alarm Panels With Radio Transmitting Capability

KFRI Combo

KF3

KFRTI-20/52

### Features:

- NEMA 3R Rainproof Enclosure with Security Lock
- KFRTI-20/52 Has Modular Four Input Class B Zone Boards (Expandable to 20 or 52 Zones)
- KFRTI-20/52 Has Modular Two Input Class A Zone Boards (Expandable to 10 or 26 Zones)
- KFRTI-20/52 Has Front Panel Annunciation of Total Alarm System Status for Each Zone
- Panels Have the Built-In Capability of Automatic Radio Reporting for Alarms, Supervisory, and Trouble Conditions with "True Interrogate" Test Status Reporting
- Panels Can Send Radio Transmission Up To 25 Miles Away
- Panels Have Quick Insertion/Removal Field Wiring Terminal Blocks
- Modular Controls for Easy Operation
- Factory Mutual Listed
- Designed to Comply with All NFPA Standards
- Easy Maintenance and Service with Internal Removable Boards

**King Fisher Company, the worldwide provider of High Quality Fire Radio Municipal Systems, proudly introduces their Municipal Series of Fire Alarm Systems that are capable of directly reporting Automatic Radio Zone Identification to Lakes Region Mutual Fire Aid.**
